DOMINION DAY SPORTS FEATURED IN BLAIRMORE

Once again the big Blaimore Stadium came into prominence, when on Monday, Dominion Day, a number of new athletic records were notched up to its credit.

The day opened with rain showers, and remained cool throughout—just ideal for those competing in all events, but rather chilly for summer-clad spectators.

The entire programme was pulled through without a hitch. The Coleman brass band was in attendance throughout the day. The big dance in the Columbus hall at night wound up Blaimore's big day of the year.

Space and time will only permit us quoting the winners, first second and third, in the various events:

Girls' race, under 9, fifty-yards—L. Pitt, F. Mison, L. Alexander.
Boys under 9, fifty-yards—D. McDougall, J. Patterson, R. Veprava.
Boys under 11, sixty yards—S. Slugs, D. McDougall, M. Marcell.
Girls under 13, seventy-five yards—V. Kubik, M. Patterson, S. McDon.
Boys under 13, seventy-five yards—J. Lloyd, A. Rhodes, G. Ritchie.

Girls under 16, eighty-five-yards—D. Costick, M. Nicflore.

Boys under 16, eighty-five-yards—S. Alexander, H. McLafferty tied for second with E. Marcellin.

Running hop, step, jump, boys under 19—L. Fournier, J. Gilkes. Under 16—E. Seaman, M. Harper. High jump, girls under 16—D. Costick, J. McDonald.

High jump, boys under 19—L. Fournier, A. Costick.

High jump, girls under 16—D. Costick, J. McDonald.

ST. ANNE'S CHURCH TO CELEBRATE JUBILEE

St. Anne's Catholic church will celebrate their twenty-fifth anniversary on Wednesday next, July the 10th.

Functions include a procession from the church at 10.15 a.m., headed by the West Canadian Collieries band, to the Blaimore athletic stadium, where an open air Pontifical High Mass will be celebrated at 10.30 by Rt. Rev. P. J. Monahan, Bishop of Calgary. Sermon will be delivered by Rev. Father Killip.

At 1.30, a banquet will be served at the Columbus hall, for which tickets may be purchased at 75 cents at the Blaimore Hardware store. These are on sale up to 5 p.m. of Monday, the 8th.

A tableau will be staged in the hall at 8 p.m. Admission 35 cents and 15 cents.

Jubilee Ribbons will be distributed at the church before the start of the procession.

In connection with the jubilee celebration, a booklet has been published, giving practically the complete history of the church and its work since its inception twenty-five years ago. This booklet forms an ideal souvenir and not only parishioners of St. Anne's, but the public of Blaimore and the Pass should secure copies at the nominal price of 25 cents.

Everybody welcome to all functions.

—**WORBOYS-KOVAK**—

A quiet and pretty wedding was solemnized at Coleman on Tuesday morning, with Father Dunbar officiating, when Eleanor Kovak became the bride of Stanley Worboys, of Lethbridge.

The bride was charming in an ankle-length dress of pink paint d'espirt, with a picture hat and slippers to match. She carried a bouquet of Madam Butterfly roses and lilies of the valley. She was attended by Miss Ann Yanota, of Blaimore, who wore an ankle-length gown of Nile green chiffon organdie, with picture hat to match. She carried a bouquet of pink carnations. The groom was supported by Steve Ondrus, of Coleman.

Following the ceremony, a reception was held at the bride's home.

Mr. and Mrs. Worboys left on the afternoon train for points west. For travelling, the bride wore a rosewood colored suit with brown accessories. Mr. and Mrs. Worboys will reside in Lethbridge.

—**MEN OF CANADA**—

You men who feel you're underpaid, Check up the gain your company's made.

Then if you've cause to strike, why strike!

But not under order of a foreign mike.

Ask these foreign-leaders who is paying them for what they do.

Who've you men to call your own? Has as well can make your wishes known.

Tell these sneaking "Reds" to go. Choose as leaders those you know; And when you've cause to strike, why then

Strike as true Canadian men.

Do you want New Russia's rule? Will you be their agents' fool? Men of Canada, beware, Lest you're caught in Russia's snare.

—M. Josephine Turner.

Miss Isabelle Alexander, graduate of Manitoba agricultural college and for eight years in field work amongst women in rural Manitoba, has been appointed director of the Women's Home Bureau Service of the Alberta government.

ABERHART IS WELL RECEIVED AT BELLEVUE

An audience of around 2600 greeted the leader of Alberta Social Credit, William Aberhart, of Calgary, at the Bellevue arena last night, when he delivered one of the ablest addresses since the opening of the campaign.

Mr. Aberhart was ably introduced by Mr. D. Hoyle and Rev. Roy C. Taylor, of Coleman. In his introductory remarks, Mr. Taylor referred to the guest speaker of the evening as "the most beloved man in Alberta."

Mr. Manning, Aberhart's lieutenant, was also present and spoke briefly.

Following Mr. Aberhart's address, an opportunity was afforded for questions, and quite a few were advanced and answered satisfactorily.

The Coleman band was in attendance and rendered enlivening selections.

Judging from the meeting last night, one could not but realize that Social Credit has a stronghold in this particular section of the province. Hundreds of foothills farmers were in attendance.

A collection was taken to defray expenses, and the amount was announced as \$115.00.

Thanks were extended the Bellevue Arena Co. for the free use of their building, also to the Band for their splendid services.

At the close of the meeting, Mrs. Aberhart was presented with a bouquet of wild tiger lilies by Miss Jean Cameron, of Burnis, on behalf of the Burnis Social Credit group. These flowers were very much admired by Mrs. Aberhart.

Shortly afterwards, the speakers of the evening and a large number of district friends, were guests to a luncheon served in the I.O.O.F. hall.

Messrs. Aberhart and Manning addressed a capacity audience at Pincher Creek in the afternoon.

A meeting in the interest of Social Credit is to be held in the Coleman Community hall tomorrow evening, to be addressed by Mr. Sow.

—**COUNTER CHECK BOOKS**—order them at The Enterprise office at the same price as you can get them at the factory, or from a traveller. Keep as much money as you can in Blaimore.

Mayor Knight states that if anyone thinks that he is grafting from the town to lay a charge and he'll go down there. Anyway, he himself states that the blue spruce trees were grafted.

A decree nisi, to be made absolute in three months, has been granted by Mr. Justice Tweedie in the divorce suit of Margaret E. Beck, of Magrath, and Charles F. Beck, of Coleman, with custody of the child and alimony.

Following riots in Regina, in which Detective Chas. Miller was killed, some eighty strikers, including Arthur Evans, communist leader, and one of his lieutenants, George Black, were arrested and are awaiting trial on various charges.

"SEQUOIA"

A transient, glancing at Blaimore's boulevard on Friday last, remarked excitedly: "How beautiful heaven must be!" Well, it is kind of a reminder of heaven, you know.

The marriage took place recently of Miss Vivian Irene Scott, second daughter of Inspector and Mrs. J. O. Scott, of Vegreville, to Mr. Roy E. Walton.

Last night's big meeting in Bellevue was the most orderly ever held in this district. A noted feature also was the fact that the handclapping had no recognized leader. In other words, the meeting wasn't a red one.

Miss Beatrice Trono arrived home from Calgary the early part of the week to spend her vacation with her parents. Miss Trono has been taking a course in advanced music at Calgary.

When we met a lady coming from the theatre a few nights ago, and she remarked: "You should be in the pictures," she meant: "We should have seen the show." Thanks, lady, for this explanation.

The marriage took place at Pincher Creek on June 18th of Miss Patricia Winner, of Walkerville, P.E.I., to Frank Telfer, manager of Safeway Store at Pincher Creek, formerly of High River.

Miss Megan Jones, teacher, left Coleman last week to spend her vacation in Wales. She sailed on the Duchess of Bedford from Montreal and will return on the Empress of Britain.

WORLD HAPPENINGS
BRIEFLY TOLD

It was officially announced 102 persons lost their lives in the munitions factory explosion at Reinsdorf, Germany, June 13 and 723 were injured.

Britain has invited Russia to naval talks. It is suggested Russian naval experts shall come to London after visits by French and Italian delegates.

Total gross agricultural revenue of British Columbia in 1934 is estimated at \$39,526,141, compared with \$36,647,007 in 1933, in statistics released by the provincial government.

An aerial traffic survey, to determine whether traffic cops could help unsual New York's crowded Sunday motor traffic, was made by First Deputy Police Commissioner Harold Fowler.

The Cuban bill amending the Franchise Act passed through the House of Commons. It would prevent judges from upsetting decisions of franchise registrars without positive evidence.

Prof. Karl Barth, of the University of Bonn, was indefinitely suspended from the chair of theology for his refusal to take an immediate and unconditional oath of personal loyalty to Chancellor Adolf Hitler.

Salvage experts have made plans to attempt to locate the wreck of the Lusitania, sunk by a German submarine 20 years ago. A. A. Bette, surviving officer of the vessel, will participate.

A bleached skeleton, identified as that of Herman Nothergal, Spiritwood, Sask., farmer, was found two miles from his farm by Joe Doucette, of Spiritwood. Nothergal had been missing from his home since June 1, 1934.

Accompanied by nine college students, two sheep and 60 chickens, Captain Bob Bartlett, author and explorer, sailed from New York in his schooner, Effie G. Morrissey, on the first leg of his ninth trip to Greenland.

Canada's military forces are represented in the supplementary estimates tabled in the House of Commons by estimates for all three arms of the service. For the militia the appropriation is \$1,651,000; for the naval service, \$145,000; and for aviation, \$1,302,900.

An Amazing Apparatus

Enables One To See And Read With Eyes Closed

A Canadian physician's device which enables one actually to see and read with the eyes tightly closed, is attracting much attention at the scientific exhibit to the American and Canadian Medical Association at Atlantic City, N.J.

The apparatus is the work of Dr. A. Howard Pirie of the Royal Victoria Hospital, Montreal, and is based on his discovery that X-rays, contrary to hitherto prevalent belief, can be seen by the human eye.

Physicians have pressed their closed eyes against an eye-socket in front of the X-ray tube and, to their amazement, have been able to read words and see pictures just as though their eyes were open.

Dr. Pirie is using it in detecting the location of foreign bodies lodged in the eye and to determine whether a damaged condition exists in the retina.

Origin Of Pall Mall

Street Named For Game Played In The 17th Century

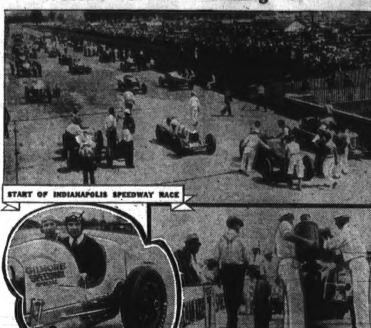

Most people have heard of a street in London called Pall Mall, and its how it got its strange name. In the 17th century there was a very popular game in London called Pall Mall, identified with croquet which is still played to-day. It was popular with most of the gentry. The object of the game was to drive a ball along a straight alley and through an elevated ring with a mallet. The alley for pall mall was hardened and strewn with pounded shells so as to present a perfectly smooth surface. The game has completely died out, for there is no trace of it for centuries, and the only relic of the game is in the name of Pall Mall street.

Editor's Son: "Did you ever have a great ambition when you were a boy of my age?"

Editor: "Certainly. My one wish was to wear long pants. I got my wish, because, if there is anyone else in this country that wears his pants longer than I do, I'd like to meet him."

London will provide facilities for "family" bathing at public pools.

World's Greatest Racing Classic

ABOVE: SCENE IN THE "PITS" A CAR IN FOR GAS LEFT: KELLY PETILLO, WINNER, AND HIS MECHANIC

Unfortunately the average spectator at the annual Indianapolis Speedway Classic is unable to witness much of the tense drama of the race, which takes place in those little concrete-walled boxes known as the "pits", located on the "apron" of the track near the starting point. Here the "teams", composed of a dozen men—a necessary organization for every entrant—perform their duties in an atmosphere tense with excitement but with the precision of a well-drilled stage show. Without their help no driver would stand a chance of winning.

There is the directing genius behind the strategy involved in this four-and-a-half-hour contest. Whirling around the two-and-a-half-mile rough brick oval at speeds approaching 150 miles an hour, their senses reeling from the thunder of their motors, the tunes from the engines, and the eye strain, the drivers lose track of their position and their speed.

It is the pitmen who keep them informed on these important matters, and advise them regarding strategy through a complicated system of signaling. When to come in for water and gas, and who the leaders are at the moment are among the many pieces of information that the driver must depend upon his pit crew for.

The pitmen are the actual race itself. A car slides onto the apron and stops in front of its own pit. Half a dozen men leap for the concrete wall, each concentrating on a definite job. The cap is off the radiator in a second and a stream of cool water is poured in; gasoline is already being poured into the tank; tires are examined; and two men lift

the hood and their expert eyes and ears can tell in a split second whether all parts of the engine are synchronizing.

One or two A.A.A. officials dash up. The pit crew gives them an anxious glance, for their inspection may mean loss of many precious seconds—possibly the race.

These officials have the authority to order adjustments, and if in their judgment the car has a defect, to order it from the race as a precaution of safety for all concerned.

Kelly Pettillo won this year's race, setting a new track record of 106.24 miles per hour. Each of the two times Pettillo stopped at the pits, he was seen to continue to sway in his seat, not yet recovered from the effects of the bodily rhythm induced by the terrific car-riding at high speed. Peter DePaolo, his pit manager, said that he had been on the track with a fresh supply of gas and water, and his engine in perfect tune.

Pettillo frankly stated after the race that much of the credit for his performance was due to two factors—his pit manager and his tires.

The winner said he was tempted several times to "burn up" his car early in the race to catch the several drivers ahead of him. "I knew my Firestone tires would stand any speed my car could go," he said, "but I had my instructions from Peter DePaolo. He said, 'Don't burn out your tires. I followed it.' DePaolo signalled instructions to Pettillo on almost every lap of the 200.

In the pits, too, watching and checking car performance, is the engineering genius of the country.

Take time for instance. The recent race marked the sixteenth consecutive cent in which Firestone tires had been on the winning car.

Firestone engineers and designers were in the pits throughout the race, checking every phase of the car's performance. The drivers buy and pay for their tires, and have for years had been on the winning car that finished and there was not one tire failure. With new records each year, the problem for tire and motor car engineers is ever new.

Recipes For This Week

(By Betty Barclay)

SPANISH SAUSAGE

- 1 pound pork sausage
- 6 small green peppers
- 1 cup bread crumbs
- 1 cup tomatoes
- 1 onion, grated
- 1 cup diced celery

Mix sausage, bread crumbs, grated onion, and diced celery. Moisten with tomatoes. Cut tops of green peppers, remove seeds and parboil for five minutes. Stuff with sausage mixture and bake in a moderate oven (350 degrees F.) for 30 minutes.

MUSTARD SALAD DRESSING

- ¾ cup sweetened condensed milk
 - ¾ cup tomato catsup
 - ¾ cup prepared mustard
- Thoroughly blend sweetened condensed milk, tomato catsup and prepared mustard. Chill. Serve on lettuce or vegetable salad. Makes ¾ cup.

New Rolling Stock

C.P.R. Is Calling For Tenders For New Equipment

As a preliminary order in the new equipment program provided for by the Unemployment Relief Act, it was announced the Canadian Pacific Railway had invited railway car companies to submit tenders for 1,500 new freight cars. Additional units, including passenger cars and locomotives, will be ordered later.

The invitation for tenders just issued included 500 box cars, 300 coal cars and 150 refrigerator cars.

It takes eight gallons of special oil to give each of the elephants in the London zoo its annual "beauty bath."

Little Journeys in Science

HUMIDITY

(By Gordon H. West, M.A.)

Humidity not only has an important bearing on the comfort of man but it has also a marked effect on his daily affairs. The story of humidity begins with the fact that water vapour is a normal component of the earth's atmosphere. Water vapour is simply water in the gaseous state. It is invisible and we cannot become aware of it directly by our senses. Unlike the other elements of the atmosphere, nitrogen, oxygen, argon and the rest, the amount of water vapour present in the air varies greatly from time to time and from place to place. It is sometimes present in the air to the extent of 5 per cent by volume, occasionally the amount is too small to be measured.

The air is furnished with water vapour by the evaporation of water in liquid or solid form, as contained in lakes, rivers, seas, oceans, and plants. The amount of water vapour which the air can hold depends upon the temperature. Warm air can hold more water vapour than cold air. Strictly speaking, the temperature limits the amount of vapour that can occur in a given space regardless of the presence or absence of other gases, and in scientific language we say that the air is saturated with water vapour when it contains the maximum possible amount of vapour.

If the air is fully charged with water vapour, or in other words saturated, any drop in temperature will cause some of this gas to change to a liquid or solid. This is due to the fact that cold air cannot hold as much water vapour as warm air. In science we say that some of the water vapour has condensed, and the excess is expressed in the form of rain or snow.

With the aid of an instrument known as the hygrometer, scientists measure the relative humidity and this value is expressed in percentage. Thus if at a certain time the air is charged with water vapour to half its capacity, the relative humidity is said to be 50 per cent.

When the air is saturated with water vapour, the relative humidity is 100 per cent. Relative humidity plays a very important role in human affairs because it is one of the chief factors in the process of evaporation. When the relative humidity is low, evaporation takes place rapidly from all moist surfaces exposed to the air.

When the relative humidity increases, evaporation slows down, and when it reaches 100 per cent, evaporation stops. The seasoning of lumber, drying of fruit, vegetables, fish and the family wash, as well as many other familiar operations, require comparatively low relative humidity of the air for their rapid performance.

Humidity has a marked effect upon human comfort. The saying that "it's not the heat but the humidity" contains a great deal of truth, though it is not the whole truth. Our sensations of heat and cold depend on the rate at which heat leaves our bodies, and this is regulated, so far as atmospheric factors go, by the feeling power of the air, which depends upon three things: temperature, wind and humidity. The thermometer may climb into the thirties, yet if the humidity is low we remain comfortable, especially if a breeze is blowing. Such temperatures combined with high humidity are unbearable.

Europe has 11 ruling monarchs—10 kings and a queen. There are only 17 ruling monarchs in the entire world to-day.

If you're in doubt whether it's a water or a useful plant, in nine cases out of ten it's a weed.

Household Arts

by Alice Brooks

Pattern 5365

Time—so valuable to every one of us—is especially conserved for the knitter in this unusually attractive fifty-knit blouse. Big needles—a lacy stitch and the result is a blouse that, like most of the others in the series, is easy to make. The lacy effect is a very flattering style.

In pattern 5365 you will find complete instructions for making the blouse shown; an illustration of it and of the stitches needed; material requirements. This blouse comes in sizes 34 to 40 inches bust (even in the one pattern) and also contains a plain knitted skirt in these sizes.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to House Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg.

There is no Alice Brooks pattern book published.

SUNDAY SCHOOL LESSON

JULY 7

MOSES
(Leader and Lawgiver)

Golden Text: Blessed is the nation whose God is the Lord Psalm 33:12 Lesson: Exodus, Chapter 24. Devotional Reading: Exodus 34: 27-35.

Explanations And Comments

Moses Leads the People to Ratify the Covenant, Exodus 34:3-8. After Moses had ascended Mount Sinai and there had lodged in his mind "the words and the judgments" recorded in Chapters 21, 22 and 23 of Exodus, he told the people about them and they agreed to obey them. With one voice they answered, "All the words which Jehovah hath spoken will we do." "Remember that every lip [save of two men] which is united in that lightly made vows drew its last breath in the wilderness, because of disobedience, and the burst of homage becomes a sad witness to human weakness and changeableness. For a moment the people were emboldened, and obedience came from the heart. But when they were saying in that brief space of devotion, 'It was high-water then, the words which Jehovah hath spoken will we do.'" (Alexander MacLaren).

Moses first act was to prepare a written copy of the laws which the Divine Presence and surrounded it with twelve unwritten laws to represent the twelve tribes of Israel. "The law of the covenant, which was the antiquity of the site of sealing the covenant recorded here, as they were afterwards forbidden, owing to their association with heathen worship." See Dt. 16:22.

Then young men offered burnt-offerings and peace-offerings. "Burnt-offerings and peace-offerings differed mainly in the use of the sacrificial, which was wholly consumed by fire in the former, while it was in part eaten by the offerer in the latter."

The newly-written book was produced and read, and again the people shouted their agreement to obey its laws. "Half of the blood of the sacrifice had been poured upon the altar, and now with the other half the people were making, and thus the covenant was ratified as the solemn words were spoken, 'Behold, the blood of the covenant, which Jehovah hath made with you concerning all these words.'"

To Take Out Squeak

Private Firms Will Make Shoes For Royal Marines

To quiet the tread of the Royal Marines of Britain their shoes are to be made by private firms. Since the formation of the organization in 1922 the members have made their own footwear. Admiralty officers announce that the change of makers is for economy, but shoemakers say the real reason is that shoes made by the marines have always squeaked.

Snow In South Africa

Snow fell at Durban, Natal, South Africa, June 13, for the first time in the memory of living men, and several lives were lost in the strange mixture of weather. The inhabitants of the city, noted for its hot, humid climate, shivered in the cold wave. Railroad and highway communications were wrecked by a 12-inch rainfall. Several bodies were sighted floating in the resultant flood waters.

Parchment is different from leather in that it is not tanned.

From Coast To Coast

Canada's Precise Level System Stretches Over 25,000 Miles

Altitude or height above sea level, of the site of any proposed development is of major importance in the orderly opening up of a new country like Canada. Consequently the provision in accessible form of information concerning exact levels is important. Sea level of the water of such data is one of the duties of the Geodetic Survey of Canada, Department of the Interior.

In line with practically every country in the world, Canada has adopted mean sea level as its datum for altitudes. Sea level of the water of such data is one of the duties of the Geodetic Survey of Canada, Department of the Interior.

The actual determination of mean sea level at a primary tidal station is made by the Tidal and Current Division, Hydrographic Service Department of Marine. Hourly readings on an automatic gauge for a period of at least seven years are considered necessary for a trustworthy determination of mean sea level at a primary station.

The Canadian precise level system is based on the determination of mean sea level at five primary stations, namely, Halifax, Yarmouth, and Father Point, on the Atlantic; and Vancouver and Prince Rupert, on the Pacific. By means of precise levels sea level datum is carried inland so that to-day Canada's precise level system stretches from coast to coast and has a total extent of over 25,000 miles. — Canada Week By Week.

Conscription Of Wealth

Canadian Legion Would Call On All Resources In Event Of War

Conscription of wealth and natural resources, as well as man power in the event of war, was urged in a resolution passed at the closing session of the Saskatchewan Fur convention of the Canadian Legion at Moose Jaw.

The convention in another resolution went on record as being in favor of an agreement that every nation immediately abolish the private manufacture of arms and other implements of war. A number of other resolutions were also discussed and passed. Officers of the provincial organization were elected and several speakers made addresses.

E. C. Leslie, Regina, was elected president of the provincial command; L. T. Chase, Mervin, was elected first vice-president; R. D. Roberts, Fort San, was elected second vice-president. J. C. Malone, Regina, honorary treasurer, and H. T. Plazy, Saskatoon, T.V.S. representative.

An Eight-Eyed Camera

Developed In Germany Can Photograph 220 Square Miles

Koen, interest was displayed at Munich, Germany, in military possibilities of an "eight-eyed" aerial camera recently perfected by a local optical firm. The manufacturers said the new panoramic camera is far superior to any now in use.

It was claimed the new camera can photograph a minute detail an area of 220 square miles from an altitude of 15,000 feet. The plates can be developed immediately, then put through another new device which corrects deformations of perspective, and the result assures a faithful reproduction of the countryside, ready for instant use.

It was said fast planes equipped with these cameras could fly over enemy territory and return to home airports with the complete photographic story of troop movements, gun emplacements, ammunition stores and other military information.

The Hardest Mineral

Diamond Has Qualities Very Similar To Many Humans

The solemn unwrapping at the American Museum of the largest known diamond in the world constituted a study in value. The diamond, in the words of one authority, is "the hardest, the most imperishable and also the most brilliant of minerals." It is among the rarest, and it also comes close to being one of the rarest in the world. Qualities it has been regarded through the ages with admiration, fear and awe—very much as hard, durable, brilliant and useless individuals have commonly been regarded by their fellow men.—New York Herald Tribune.

Germans who wish to leave their native land must pay a tax.

MISS ALADDIN

—By—
Christine Whiting Farmer
Author Of
"One Wide River To Cross"
"The Unknown Port," Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gray, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers her a home in a place where she can live in comfort and what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. They are met at the railway station by Columbine Nelson, who in turn introduces Mark and Matthew Adams, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village causes dismay to both Nancy and Jack because of its dilapidated appearance and general lack of poverty.

No Go On With The Story

CHAPTER VII—Continued

As the car moved forward even Jack was dumb. They passed a filling station—a grocery—the post office and drug store—a ramshackle place marked "Restaurant" at which Nancy shuddered—a two-story hotel its narrow porch hugging the dusty road as if land were too scarce in this vicinity to afford a lawn.

"But there's Cousin Columbine's estate," thought Nancy, grasping at this straw. "It can't be near these awful places. Perhaps there's a side street or—"

No. Mark was steering the car between two sagging gate posts. Nancy stared ahead. Was this the boasted family mansion—this hideous frame house with peeling mustard-colored paint and a pretentious tower at one corner? A wave of rebellion swept through the girl; and something curious seemed to be happening to her ears. She raised her hands to press against them, but heard Cousin Columbine say quickly:

"Bare popping? That's only a little, my dear. We're nearly ten thousand feet above the sea, and on almost the very spot where I was born. Father built this house after he struck silver at Leadville in '78. As you see, it's in need of a coat of paint; but it needed something else a great deal more so the paint must wait a year or two. Stop at the side door, Mark, or Matthew's likely to bump into us. Aurora! Aurora! Where are you? Come out at once and meet my relatives. Well, Nancy," she turned, her blood-faced bearing with happy pride, "what do you think of it? Does the Nelson mansion come up to your expectations?"

CHAPTER VII.

"... And all that saved me," wrote Nancy in her first letter home

QUIVERING NERVES

When you are just on edge... when you can't stand the children's noise... when everything you do is a burden... when you are irritable and blue... try Lydia E. Pinkham's Vegetable Compound. 98 out of 100 women report benefit.

It will give you a restful easy energy you need. Life will seem worth living again.

Don't endure another day without the help this medicine can give. Get a bottle from your druggist today.

Lydia E. Pinkham's
VEGETABLE COMPOUND

"It's not the cutting I mind, Miss Columbine," Aurora corrected, appearing through one door as the boys came in another, "but seeing it disappear so—so rapidly. You move the family Bible, Matthew Adam, and I'll set it right here on the centre table. It's a handsome cake, I think you'll all agree. Shall I do the cutting, Miss Columbine? I declare, it seems almost a pity."

"What do you think that cake is for, Aurora?" snapped Miss Columbine. "A parlor ornament?" (Nancy smiled though the phrase sounded unpleasantly familiar). "I'll cut the thing myself, or these young folks will go hungry. Give me that knife, and shut your eyes if you can't bear to look upon such desecration."

"You don't need to cut 'em quite so thick," remonstrated the anxious woman, hovering near. "That's a four-layer cake, Miss Columbine, and a wedge two inches at the widest parts enough for any one. Those Adam boys" (she spoke as if the young men were not present) "have got fierce appetites when they go to places, which is no wonder because their mother's not what you'd call a natural cook and owns to it herself, so there's no occasion for hard feelings. If Nancy eats that big wedge now, Miss Columbine, she won't have any appetite for supper."

"Oh, leave us be!" returned the older woman with a frown. "Leave us be! Here's your place, Matthew, and don't drop frosting on the carpet. Stand close to the stove, all of you, and let the crumbs fall into the coal hod. And be sure to tell Aurora how good it is. That's why she's hanging round the door."

"It's great!" grinned Jack, at which Aurora beamed.

"It's simply marvelous!" said Nancy.

The smile widened; while Mark Adam, an appreciative hand upon his stomach, murmured: "It's superb, Aurora. I warn you now, Miss Columbine, when I get married I aim to steal your cook."

"Wouldn't it be better to marry the cook herself and keep her in the family?" asked Matthew solemnly. This suggestion, coming from a hitherto silent and obviously bashful young man, was not short of amazing. Nancy glanced at Matthew with new interest; but Aurora smiled.

"And me, married to Victor Tubbs for twenty years? You should be ashamed, Matthew Adam. I don't believe in divorce; and I wouldn't marry my brother if I was a widow woman and he the man's creature in Pine Ridge. He's got a fickle nature, Mark Adam has, and I've always said, give me a faithful man or none at all. Help yourself to another slice, Matthew, if you're so hungry you have to lick the frosting off your fingers. And then you'd better be starting along home. These young folks will want to begin unpacking; and if you've got some good, thick cotton stockings, Nancy, I advise you getting into them double quick. Did you travel all the way from Massachusetts in this dress? It looks real fresh. If you'll give me your trunk key I'll admire to unpack for you."

"No doubt you would," spoke up Cousin Columbine, "but it's high time they were thinking about our supper, Aurora. Better take some cake to munch on the way home, boys; and here's a couple of dollars that I owe you."

"What for?" asked Mark, puzzled eyes on the proffered money.

"For carrying those trunks, and us, you donkey!" she replied.

"Great thundering prairie dogs!" exploded Mark. "Do you take us for a pair of gyps, Miss Columbine? Come on, Matt, we better get going. The lady wants to pay us for a little matter of lifting trunks!"

"The cake was pay enough, Miss Columbine," Matthew assured her with a shy smile. "We wouldn't think of taking any money. We must run along now or we won't get home in time to milk. Good-night, cutting for yourself, Mark Adam, you'd better go easy on your supper or I won't be accountable for how you'll feel come midnight. That's a rich cake; richer than common because of company. If you don't hurry Matthew will get home first with all the news."

This caused still further confusion, the young man apologizing, his face scarlet; and Aurora demanding to know why he didn't look where he was going.

"Land knows I'm not so small he had to miss me in the landscape," she complained as Matthew vanished, his ears pink with embarrassment, a wedge of the precious cake in hand. "If that's a third slice of cake you're cutting for yourself, Mark Adam, you'd better go easy on your supper or I won't be accountable for how you'll feel come midnight. That's a rich cake; richer than common because of company. If you don't hurry Matthew will get home first with all the news."

"You sure do speed the parting

for BITES

Draws out the poison

MINARD'S

"KING OF PAIN"

INIMENT

greatest, Aurora," he commented, "but don't you worry about that news. I'll overlook poor Matt before that cruel blush has had time to subside. Good-night, Miss Columbine. The cake was bulky."

There was surely nothing shy about this young man, thought Nancy, as he extended a friendly hand to all of them (not omitting Aurora); lifted his third slice of cake from the platter, and said: "I'll drop in to-morrow and see if you've got acclimated."

To all appearances he was addressing Jack; but his eyes were on Nancy; and Aurora burst out as the door closed: "I warn you straight off, Nancy Nelson, that you must take anything Mark Adam says to you with a grain of salt. He's as unreliable as an April snow storm; and has broken more Pine Ridge hearts than any one on record up to date. There's an innocent look about you that makes me tremble, and I feel it my duty—"

"Oh, hush up!" commanded Cousin Columbine, while Jack found sudden interest in the landscape. So Nancy looked innocent. That was a good one! He'd have to wait that to Aunt Judy. And wasn't it distinctly understood that there were to be no boy friends? It was mighty queer about Cousin Columbine, mused the boy, still at the window. She was so sure what you'd expect from her letter than—than Nancy was like Aurora Tubbs! There was certainly something to explain here, and—

He wheeled about at a crisp command from this surprising relative.

"Wake up, Jack. Time enough to get acquainted with Pike's Peak after you're settled. I want to show you your rooms before it gets too dark. Bring those bags along and we'll go right up. I dare say you're used to electric lights; but lamps and candles are all I can provide for with. Don't bring your coat. Nancy. It can hang in the entry. Though it's cold here and will be till next spring. The stairs are steep; but high ceilings were stylish when Father built the mansion, and he wanted the best. There! This is the tower room, my dear, and I hope you'll like it. There isn't a finer view for miles around."

However prejudiced Columbine Nelson might be as to the value of her property, she did not overestimate the beauty of her view. Even in the fast deepening twilight, Pike's Peak stood out gloriously clear against the sky.

(To Be Continued)

Opening Rubber Factory

One of the present industrial plants in Soviet Armenia is being opened at the foot of the ancient mountains of Ararat. It will produce synthetic rubber, and has been under construction for three years. One unit has started operations. It is estimated that \$240,000 will be spent in further construction this year.

Unlucky Sports Fan

Sammy Hill is just about the bluest bootlicker in San Francisco—and the saddest. He bet 2.45 shillings at odds of 25-to-1 that Max Baer would beat James Braddock in their heavyweight fight. Now the successful Braddock winners are collecting with a vengeance.

Partial unemployment in France is still large.

Restrictions Were Lifted

British Soldier Allowed Out Of Detention Barracks For His Wedding

Army history was made at Aldershot, England, when a young gunner in the Royal Artillery was let out of detention barracks to marry a Welsh miner's daughter. Two hours later he returned from the church to the barracks to complete his sentence for a military offence.

Never before had the army authorities released a soldier to enable him to be married. The authorities had been appealed to by a friend of the bride not to stop the wedding plans, and it was only after much deliberation they agreed to allow the prisoner out for exactly two hours.

After the ceremony the smiling couple were allowed to spend 60 minutes together in the vestry, where a brief reception was held. Then the husband returned to detention and the bride to her place of occupation.

Newspaper Advertising

Has Great Advantage Over Other Forms Since Premier Fattino

"Newspaper advertising has tremendous advantages over other forms of advertising," Premier T. D. Pattullo stated in connection with the Dominion-wide advertisements with which British Columbia presented its case for a changed relationship between province and Dominion.

"A newspaper advertisement," said the premier, "possesses stability and permanence. It can be studied at leisure, analyzed, and followed up intelligently by discussion. The printed word can not very well be controverted, and possibility of misconception is minimized."

"For public messages of importance that require careful study and cool analysis, nothing can supersede the press."

THE RHYMING OPTIMIST

By Aline Michaelis

I do not hold your immortality Is but a memory dwelling in my thought. Although by night and day your face and features are all I can provide for with. Don't bring your coat. Nancy. It can hang in the entry. Though it's cold here and will be till next spring. The stairs are steep; but high ceilings were stylish when Father built the mansion, and he wanted the best. There! This is the tower room, my dear, and I hope you'll like it. There isn't a finer view for miles around."

However prejudiced Columbine Nelson might be as to the value of her property, she did not overestimate the beauty of her view. Even in the fast deepening twilight, Pike's Peak stood out gloriously clear against the sky.

Diamond Well Guarded

Jonkher in Bullet Proof Case At American Museum

The \$1,000,000 Jonkher diamond is on display at the American Museum of History, but none of the 4,000 persons who saw it the first day attempted to steal it.

The diamond is in a bullet-proof glass case.

Should anyone touch the case, it would instantly vanish into a vault. Guards who stood nearby practised sharpshooting before going on the job.

Fias Did Not Work

A customs officer at Alexandria stopped two men carrying a sack of kitchen rubbish from a ship. Eighteen chickens' heads were in the bag. The officer opened the bird's beak and out poured a quantity of opium from each. The two men were arrested.

DOUBLED UP WITH RHEUMATISM

Could Not Wash Himself Nor Brush His Hair

So bad was his rheumatism that his friends declared he would never work again. Although he is 70 years old, he proved they were wrong. Read what he says—

"I am seventy years of age. Last Christmas I was completely doubled up with rheumatism. I could not brush my hair nor wash myself. People said I should never work any more. I am working harder than a young man to-day. Thanks, many thanks, to Kruschen Salts. I take them in my tea, and I have recommended them to many. I could not get in or out of bed myself, nor sit up. I was in bed now—12 hours sometimes. Kruschen Salts have done it for me—G.J."

Rheumatic conditions are the result of an excess of uric acid in the body. Two of the ingredients of Kruschen Salts have the power of dissolving uric acid crystals. Other ingredients assist Nature to expel these dissolving crystals through the natural channels. In addition, there are still other salts in Kruschen which prevent food fermentation in the intestines, and thereby check the further accumulation not only of uric acid but of other body poisons which undermine the health.

Little Helps For This Week

The ornament of a meek and quiet spirit which is in the sight of God of great price. 1 Peter 3:4.

Thy sinless mind in us reveal Thy spirit's plenitude impart; Till all thy spotless life shall tell The abundance of a loving heart.

—Chas. Wesley

Holiness appears to be to make the soul like a garden of God with all manner of pleasant flowers, that is all pleasant, delightful and undisturbed, enjoying sweet calm and the gentle life-giving beams of the sun. The soul of a true christian appears to be a little white flower like we see in the spring of the year, low and humble on the ground, rejoicing as it were in a calm rapture, diffusing around a sweet fragrance, standing peacefully and lovingly in the midst of other flowers round about, all in like manner drinking in the beams of the sun.—Jonathan Edwards

New Soil Laboratory

Wind Tunnel Is To Be Constructed At Swift Current

Construction of a wind tunnel for conducting soil drift experiments at the Dominion farm in Swift Current, Sask., will be undertaken this year.

Such equipment will be a part of a new soil laboratory to be erected at the farm at a total cost of some \$25,000 including equipment. It will be used to study the effect of wind currents on certain types of soil under different methods of cultivation in a similar manner of that employed by the research council in the study of aerodynamics, for testing new wing constructions.

Forbid Hypnotism Shows

Roumania Claims They Are Dangers To Public Health

The Roumanian department of public health has issued a strict order prohibiting all hypnotism and telepathy public performances, as well as all moving pictures and plays dealing with these subjects. It is explained in the order that such performances present a great danger to public health and that numerous cases have recently been reported where people suffered serious nervous shocks by witnessing hypnotism and telepathy demonstrations.

Abandoned gold and silver mines in Mexico are being reopened.

Madame Grant De Rouen, of Quebec, militant suffragette in the only part of the British Empire which still withholds the franchise from women, is fresh, amazingly enough, but when seen in action leaves no doubt about her nativity. Has milk white skin and the kind of eyes that write to no club, league, association or group.

1919 Thinks Premier Louis A. Taschereau will grant them right after she grows claws and the Premier gives away his two sharp eyes. Has gone to Parliament for eleven successive years lobbying, wheedling, coaxing, begging and threatening members to vote for female suffrage but hasn't got to first base yet. After three years persuasion a member introduced the first bill. Then Premier Taschereau refused to call it. To wear him down Madame De Rouen sat in the gallery and stared stonily at the Premier every afternoon for eight weeks in a fury the Premier called the bill, tore it into verbal shreds and defeated it. Believes in the words: "He travels fastest who travels alone," and belongs to no clubs, leagues, associations or groups.

Someone remarked last night, that the string of car lights extending east from Bellevue to Lundbreck, and west from Bellevue to Michel, resembled very much the Blairmore boulevard. But, oh what a difference!

Andre Gustave Citroen, 57, known as the "Henry Ford of France," died in Paris yesterday following a long illness. Citroen's automobile plant was once estimated to be worth two billion francs.

WINDERMERE
A REAL CAMP

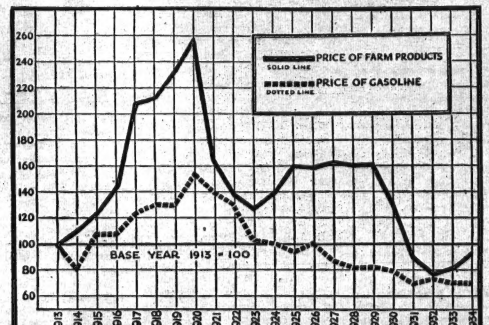

Striking while the iron is hot is a characteristic of the West that has gained the admiration of the rest of Canada. And so there is little surprise in the announcement that the Board of Trade at Invermere, B.C., has leased the bungalow camp at beautiful Lake Windermere for this summer, in anticipation of increased tourist traffic to the Canadian Rockies, which has been generally forecast in Europe, the Orient, and the United States.

The camp, which is being taken over by small but energetic Invermere, is one of the most delightfully situated in the Canadian Rockies. Built originally by the Canadian Pacific Railway, this camp has been successfully operated for the past several years as a private camp for girls. In the centre of an ideal vacation district, it is easily reached by main mountain highways. The famous Banff-Windermere road leads to it, a good alternative route being through the mountains from Cranbrook.

The lake averages about 68 degrees in the summer and is ideal for swimming and boating. Excellent trout fishing can be had in several creeks and smaller lakes near by and the lake itself has landlocked salmon of considerable size. Within a day's ride is the celebrated Lake of the Hanging Glacier, with six spectacular glaciers all concentrating in one moraine with as ice wall several hundred feet high which drops a continual succession of small icebergs into the lake.

The camp is a particularly good centre for a whole summer's rest and exploration, because many are the side trips that can be made by car, mountain-bred ponies, or on foot to adjacent spots of beauty or historic interest. Tennis courts and motor launches are available for the use of the guests.

There is accommodation for 42 guests in the camp, which consists of a large main building, with wide verandah, and of separate small bungalows, equipped with single beds, stove, clothes closet, nice furniture, running water, and electric lights. A double bath-house, with hot and cold running water, contains separate bath rooms.

The depressed price of farm products is a problem with which everyone is familiar, but on the 1913 basis farm product prices have never been as low as gasoline. Between 1913 and 1920 gasoline did not rise in price to nearly the same extent as farm products, yet since 1920 its price has almost continuously declined. The data for the above graph are based on figures published by the Dominion Bureau of Statistics.

FAIR LABOR POLICIES BENEFIT
THE CONSUMER

Worry and unhappiness are enemies of efficiency. We have always tried to be efficient and years ago we said, "to the greatest extent possible let us get worry and unhappiness out of this organization—out of the minds of every man and woman in our employ."

So Imperial Oil has always paid high wages. It set up sickness and death benefits, a pensions plan and group insurance for its workers. It made it easy for them to share ownership in the Company. It gave them a voice in the discussion of Imperial Company

policies that directly affect them. It introduced the forty-hour week, thus increasing the number of those who work for the Company.

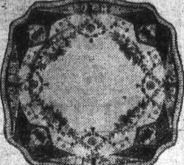

Efficiency and loyalty are repaying the Company for all these measures. Imperial Oil employees give generously of their hands and minds because they are well treated. They feel secure and this feeling is reflected in their work and in the high quality and lower cost of the products they make. The consumer benefits, the employees benefit and the Company benefits by these policies.

Here and There

Two or three times as much rainfall this year between April 1 and May 8 on the Prairies as compared with the same period last year makes the outlook for the 1935 harvest similar to that at the same time of year in 1932 when the largest crop since 1925 was recorded, states T. S. Acheson, general agricultural agent of the Canadian Pacific Railway in the West.

Leonard J. Pohlmann, travelling passenger agent, Canadian Pacific Railway, with headquarters at New York, was recently elected vice-president of the American Association of Traveling Passenger Agents of New York. Mr. Pohlmann has been a member of the association's executive committee for the past year.

Hotel Saskatchewan, Regina, distinguished itself recently by staging a Chinese Mandarin dinner dance, said to be the first of its kind on this continent. As stage decoration there was used a hundred-foot runner and side drapes, hand-made by Chinese many decades ago, and insured while in use at a valuation of \$6,000. The orchestra was in Chinese dress and provided music with a decidedly Eastern background.

T. J. Jackson, who has just been appointed first assistant manager of the Royal York Hotel, Toronto, in succession to Cyril Chapman, promoted to the post of manager of the Seignior Club of Quebec, started as cashier at the Chateau Frontenac in 1924, and has had rapid advancement to his present high position.

HILLCREST HAPPENINGS

Miss Jessie McClay, of Edmonton, and Mr. Wesley Plumer, of Calgary,

LIBERTY'S CANADIAN HALL OF FAME No. 6

When Edward Alexander Hughes, general manager of the Canadian National Exhibition, started with that institution he was paid \$2 a week. He gets more now.

He is 50 and considers it more important to have been a member of Canada's first Olympic team (1906) than to be the head man for the world's biggest annual fair. Five feet five and a half inches, brown hair and eyes.

At 20 was national running champion at two, five and ten miles. Is an Indian chief. Was booed in Ireland for singing the "Maple Leaf Forever." At 12 had saved three people from drowning. Was youngest to receive Royal Humane Society medal. Was a captain during the war. After George Young won California-to-Catalina Island Marathon swim, arranged world championship race for Toronto. Persuaded the William Wrigley Company to put up prizes and put race over as a permanent fixture.

Wanted to be a jockey, and still is envious of the laddies who boot the ponies down the stretch. Got terribly excited fishing—it catches anything. Married Florence Raymer. Has one daughter at college. Likes prize fights, canoe trips, croquet and his job.

were guests at the home of Mr. and Mrs. S. Marshall. Mr. and Mrs. Brunnett left Saturday for Edmonton, where they will

spend the two months' vacation.

Molly Penn passed her examination for Grade I piano under the Toronto Conservatory of Music. She is a pupil of Miss Isabel Westrup.

Mr. and Mrs. Webster and family left for their home in Mountain View on Friday.

Miss Mary Davies rendered a violin solo at the United church on Sunday night.

Misses B. Selson, M. Grant and I. Turner, and Mr. D. Grant left Monday for Edmonton, where they will attend summer school.

W. Hutchison sustained serious injuries in the mine on Thursday, when he was kicked in the abdomen by a horse. He is progressing favorably at the local hospital.

Mr. A. Chrysler left for his home in Calgary on Sunday.

Miss Emily Strachan left Saturday for her home in Trochu.

A very successful dance was held in the gymnasium on Saturday night, under auspices of the basketball teams.

Mr. and Mrs. Robert Petrie, of Drumheller, are visiting at the home of Mr. and Mrs. A. Petrie.

A successful strawberry tea was held in the gymnasium on Saturday afternoon by the Ladies' Aid.

Mr. and Mrs. J. Mackie are vacationing at the Pacific coast.

George Hood, of Edmonton, was a visitor here last week.

Miss N. Rose, of Toronto, is visiting at the home of Dr. and Mrs. G. B. Rose.

Mr. and Mrs. D. Kyle left on Saturday for Edmonton, where they will spend a short vacation.

Mrs. Harold Henderson was called hurriedly to Vancouver, where her mother Mrs. (Dr.) MacDonald, was seriously ill.

Successful students in the recent musical examinations for piano were: Jean Cruickshank, A.T.C.M. (honors), Margaret Adlam, Molly Penn and Eileen Willetts; and for violin: Jean Cruickshank, Lawrence Fisher, Ronald Gorton, Hazel Willetts, Rees Richards and Grant Webster.

A baby boy was born to Mr. and Mrs. M. Dougherty last Friday.

The junior baseball team defeated Blairmore juniors in the tournament at Blairmore on July the 1st. The seniors took second place to Blairmore.

Mr. and Mrs. W. H. Moser and family, accompanied by Mr. and Mrs. H. Stobbs, motored to Waterton on Sunday.

Several local Girl Guides motored out to Rock Lake, B.C., where they are camping for ten days. Mrs. W. Adlam accompanied them.

Gwyn Richards left on Tuesday for Edmonton, where he will attend summer school at the University.

A meeting of the school trustees decided to employ the services of a qualified dentist.

BELLEVUE HAPPENINGS

A large number of Bellevue people spent July 1st in Blairmore.

Mrs. H. Barlass and Miss Dorothy Barlass are spending a short vacation at Vancouver.

A number of Bellevueites spent the Dominion holiday at Waterton.

Mr. and Mrs. Gordon McIntyre, of

Lacombe, are spending a holiday here.

The dance in the Workers' hall on Monday morning was well attended. Miss Margaret Hallworth left recently for Vancouver, where she will spend a short time before going on to Pola Alta, California.

Mr. and Mrs. James Cousens, J. L. and Miss Ruby Cousens, left Sunday morning for a holiday to be spent in Seattle.

Several car accidents were reported over the week end—the usual payday kind.

A fire cross was burnt on Tallon Peak on Thursday night, the second in two weeks.

H. Harrison and wife, and Miss Yvonne, are spending a few days at Medicine Hat.

Mr. and Mrs. Fred Gilroy left Wednesday for a few days vacation at Creston.

Miss Freda Wolstenholme is enjoying a vacation at Vancouver.

The Bellevue Boy Scouts are under canvas at Lee Lake for ten days.

Joe Strauch, who has been teaching in northern Alberta, is home for the holidays.

The Girl Guides are camped at Rock Lake, B.C.

Miss Grahame left Monday for Calgary, to spend the summer vacation with relatives.

Bellevue school closed Friday for the summer holidays, and most of the teachers have departed to other points for their vacation. All are signed up for another term, excepting Miss Hallworth.

Mr. and Mrs. C. W. Johnson spent July 1st at Cranbrook.

HOW TO MAKE ICED TEA

Infuse six heaping teaspoons of Salsal Black Tea in a pint of fresh boiling water. After six minutes strain liquid into two-quart container. While hot, add 1/4 cup of granulated sugar and the juice of 2 lemons. Stir well until sugar is dissolved. Fill container with cold water. Do not allow tea to cool before adding the cold water, otherwise liquid will become cloudy. Serve with chopped ice.

"SALSAL" ICED TEA

Protect Wild Life.

This is an age of organization. Men and women, boys and girls, band themselves together in clubs, associations, unions, large or small, some single isolated groups, others as branches of a Provincial, Dominion, or international body. There are clubs to promote almost every conceivable thing, or object, in which mankind can possibly be interested. Their number is legion, and new organizations spring into existence almost every week.

Many organizations have been in existence for a long time, have large memberships, and very definite objects to serve. They have long occupied a useful and honorable place in our democracy, command the respect of all, and have made worthwhile contributions to society as a whole. Members of such bodies are banded together, as a rule, in support of some great principle to which they are intensely devoted.

There are other organizations which come into being under the stress of temporarily prevailing conditions, and when those conditions change and pass away, these organizations pass out of existence, some having exerted a beneficial influence in the direction of reform and progress; others leaving little but a trail of disillusionment and loss behind them.

It would be impossible to even list, let alone classify, the organizations now in existence making appeal for the support of the public, and it is not the intention of this article to make any such attempt. Rather at this time it is proposed to direct attention to one particular organization, to which no great publicity has been given in past years, but which has been engaged in quietly, but none the less effectively, promoting a cause in which the people of Canada ought to take a very deep and active interest. On former occasions the attention of readers of this column has been drawn to other worthwhile organizations, consequently in now singling out one specific organization for a word of commendation we are making no new departure.

The organization now referred to—possibly we should refer to it in the plural and say organizations—are the Fish and Game clubs or leagues of the various provinces. These organizations are province-wide, not confined to sportsmen alone, but wide open to the naturalist and all lovers of wild life, whether they hunt with a gun or a camera or the notebook of the scientist, for, in the final analysis, the interests of these are common to all.

The objects of these organizations are to promote wild life research; by an educational campaign to instill into the minds of people the cardinal rules and laws of nature and the necessity of giving to nature the assistance of the human element, where necessary, in order that the happiness which comes from plenty can continue to exist; to secure the passage of the necessary laws to prevent extinction of declining species and to ensure the rigid observance of those laws; to endeavor to maintain the necessary surface water supply, natural cover, trees and food conducive to a bountiful supply of useful wild life, and to control or eliminate those of its enemies which threaten its continued existence.

From this abbreviated outline of objects it will be seen that, in promoting them, these organizations are likewise promoting the welfare of all, irrespective of whether they are directly interested in the preservation of wild bird and animal life or not. For example, agriculturists and livestock men, in recent years, have seen the wisdom and necessity of conserving surface water supplies brought close home to them. Equally so, is the wisdom and necessity of protecting trees from wholesale destruction in order that one of the main sources of surface water supplies should not likewise be destroyed.

As a people we have devoted far too little thought and study to the many forces and factors nicely balanced by nature to make this world a habitable, productive and beautiful land, and we have proceeded in our ignorance to do many things which have worked to our own injury with dire results and at a tremendous cost and enormous loss to ourselves and our country. We must work with nature with knowledge and understanding, not in direct opposition to nature, if we are to survive and prosper.

Apart, therefore from the attractiveness which an abundance and great variety of wild animal, bird and fish life gives to any country, the natural conditions which make such wild life possible are likewise the conditions which give beauty to a country and provide what may be regarded as the basic foundation upon which the productivity of the land rests, for without water and natural shelter the land would become a desert.

For these reasons, among others, Canadians should support organizations like the Fish and Game Clubs, if not by enrolment as active members therein, at least by extending their sympathy, support, and co-operation in achieving the objects for which such organizations exist. In a word, every Canadian should be a protector of Canada's wild life, and alert and ready to assist in maintaining those natural conditions which alone make wild life possible.

Must Import Grain

Manchuria Will Require Extra Supplies To Feed Population

For the first time in many years, Manchuria will, this year, have to import grain in order to keep its own 30,000,000 people fed.

Because of lack of rain, it is feared that this year's crops of millet and other grains will be a failure, except in favored districts, and already the government of Manchuria has made arrangements to import 50,000 tons of rice from Saigon, Rangoon and Bangkok. Additional large purchases are contemplated.

The people of Manchuria are not rice eaters, like the Chinese farther south. They subsist normally upon mostly millet and kaoliang, a species of maize.

Shorter Men For Army

British Regulations Fix Minimum Height For Infantry At Five Feet, Two Inches

The British army is to be shorter. Recruiting regulations issued recently fix the minimum height for infantry at five feet two inches. This is two inches below the old minimum.

Cavalry of the line, tank corps, Royal Engineers, army ordnance corps may all accept recruits one inch below the minimum previously stipulated, provided they are otherwise fit.

The war office is determined, in view of the dearth of recruits, to bring the army up to full establishment.

The larger a bird happens to be, the longer its life span.

Latest Method Detects

Fingerprints On Cloth

Will Preserve Them Indefinitely After They Are Found

A new technique capable of developing fingerprints left on cloth—such as a snapshot negative is developed—has been added to the New York police department's bag of tricks.

The method, an indirect product of the Hauptmann case, includes the important accomplishment of preserving the original prints after they are found. Chemical baths bring out and fix the prints.

Shortly after the Lindbergh baby was kidnapped, Dr. Erasmus M. Hudson, a specialist in body chemistry who makes fingerprints a hobby, was called to Hopewell, N.J., to examine the ladder used in the crime.

Using an iodine-gas process, he found 500 prints where police had found none with the old powder-dusting method. Incidentally, none of the prints was identified.

Dr. Hudson was invited to direct the New York police department's crime-fighting research in this field. The successful use of silver nitrate solutions on bleached linen and other cloths of light shade, and calcium sulphide on darker fabrics, followed.

The treatment brings chemical transformation of body salts in the wax of which fingerprints are made, causing the tiny lines to become apparent to the eye. The prints may be several years old.

The new technique is superior to the currently widespread method of dusting suspected surfaces with colored powder. It was said, because the powder-dusting is effective only when the wax is fresh.

Strange Inventions

Weird Array Of Gadgets At Chicago Congress

Termed by their own president as "nuts," the gadgeteers of the 14th annual national inventors congress brought to Chicago a strange array of thimblejacks, hotnannies and doodads.

Among things which attracted spectators who viewed the exhibits of 700 inventors and 3,500 manufacturers and distributors were "hullaby bassinet," a pneumatic ladder, and a hen's nest which separates layers from their chicks.

If biddy lays an egg she automatically releases a latch which allows her to stroll out into the yard where the layers frolic. No eggs? The only door open to biddy is the one which permits her to enter another yard which big, bad men come to gather chickens for market.

"Many inventors are nuts, as I am," said Albert G. Burns, of Oakland, Cal., president of the congress. "But don't forget it's the nuts who generate ideas which develop into inventions."

In the home life sector also was the "hullaby bassinet" which, at the turn of an electric switch, provides remote control rocking for baby.

Grading Grain Wheat

To Indemnify Grain Elevators For Loss Sustained

An appropriation of \$1,500,000 appeared in supplementary estimates tabled in the House of Commons, to indemnify grain elevators which may suffer loss through the separate grading of grain wheat. The change in grading is to come into force on August 1, 1935, and the regulation was effected in an amendment to the Canada Grain Act passed last year.

Supplementary estimates amounting to \$18,362,978 were introduced by Finance Minister E. N. Rhodes. Outside of additional appropriations for public works, the department securing the largest votes is national defence, for which more than \$3,000,000 is asked.

Battles With Reptile

Noted Traveller Secures Fine Specimen Of King Cobra

Lawrence T. Griswold, noted naturalist who has headed a number of expeditions for the Smithsonian Institution and National Zoological Park of Washington, D.C., arrived at Victoria recently with a fine specimen of the king cobra, which, he said, nearly took his life.

One night in the Philippine Islands Griswold awakened suddenly to find the giant cobra ready to strike. He diverted its attention by throwing a blanket and then with other members of the party killed it. The reptile measured better than 10 feet in length.

Cummings museum, London, contains an elaborate display of witches' remedies collected from Londoners in the last few years.

Airport Now Obsolete

Thousands Of Dollars Being Spent On Alterations At Croydon

Improvements and extensions costing thousands of dollars are being made to Croydon Aerodrome to cope with the growth in air traffic.

When Croydon was equipped as a main airport at a cost of \$1,500,000 in 1925, it was considered adequate for all London's air services for many years to come.

Since then passenger and goods traffic has increased by over 300 per cent and air lines radiate to all parts of Europe, the Empire and South America.

In seven years the airport has become too small for its job, although nearly all the home airlines have been transferred to Heston and Essex airports.

The lay-out of the buildings is to be altered and extended to speed up the examination of baggage and passports. Passengers who have flown from Paris in one and a half hours are sometimes held up for 20 minutes for this inspection.

When the alterations are completed in two months passports will be inspected while baggage is unloaded from the airplane.

Methods of simplifying the loading and unloading of baggage to and from motor coaches will be used.

An Interesting Exhibit

Development Of Transportation Shown In Many Working Models

From a chariot of ancient Rome, the development, up to the present day of transportation on land, on sea and in the air, was depicted in a transportation exposition at Saint John, N.B.

Hundreds of working models showed the growth of all means of transportation from the crude vehicle of long-ago to the vastly improved and more beautiful machines of to-day.

A feature of the indoor exhibit was a miniature display of Saint John river and part of the harbor with tiny ships anchored within, and a group of 74 pictures of sailing vessels famous in the early days of Saint John.

At Union station the latest steam-locomotives were on exhibition in their "Sunday best," while at Saint John airport a fleet of Canada's speediest and most up-to-date aeroplanes was shown.

South Pole Tourist Trade

May Be Winter Sports Playground For Australians In Future

The South Pole, or rather the great ice barrier 700 miles this side of it, is envisioned as the winter sports ground of Australians of the future.

The pole is about 3,100 miles from Melbourne and the barrier 2,400 miles. The imaginative with an eye on the development of safe long-distance air travel, see the tourist of the coming day indulging in snow sports under the shadow of the active volcanoes of Erebus and Terror hunting seal, catching penguins, giving kayaking among the bergs and making short morning sled trips into the blue.

Sir Douglas Mawson, Australian polar explorer, especially has been sketching prospects for development of initiating a seal fur trade, canning of penguin eggs and the opening of a winter sports ground.

Older Picked Up Wireless

Wireless messages were received in a glider over Dunstable in last week for the first time in England. Mr. G. E. Collins, who holds the British distance gliding record, made the experiment, and he said afterwards that it was highly satisfactory.

"Solomon," said Mr. Isaacs to his son. "I have decided to insure your life."

"Solomon looked up pitifully. "Padder," he said, "my must I burn."

BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better, be better, if your kidneys are functioning properly.

GIN PILLS

FOR THE KIDNEYS

Wants Damages

Moose Smashes Automobile And Owner Wants Ontario Government To Pay

Last fall a bull moose ran into his automobile and went off with the radiator shell and a headlight rim, and now Amey Gravelle, of Naabinsing, wants the Ontario government to pay for it. He has made formal claim to the department of game and fisheries.

Gravelle said he and a companion were driving a car filled with blankets into a new lumber camp in the Glendale Crown game reserve, north of Sault Ste. Marie, Ont.

A turn in the road brought them face to face with the bull moose. As the car went forward the moose attacked. The first smash sent the license plate into the bush. The second swipe took off the radiator shell and half a fender. Gravelle and his companion were frantic as they tried to hold their seats in the car.

Will Be Read Yearly

Has Claimed Public Attention Since Probation In 1873

There are doubtless older testaments in the vaults of the Registrar's Office, London, but one which so periodically claims public attention as that of Henry Crocker, probated in 1873, which must be read at Wren Church of St. Magnus the Martyr, Lower Thames Street, whenever a descendant of one of the original beneficiaries wishes to dispose of the property inherited. In the very nature of things the petitions for reading have become more numerous as time has passed, so that one reading a year takes place, and at every reading, according to the terms of the will, the executors, the Worshipful Company of Coopers, and the Master and Wardens must put in an attendance.

Aerial Photography

New Camera To Take Panoramic Views From The Air

An invention which may revolutionize aerial photography has been perfected by an optical firm in Germany, it was announced.

The new camera, designed to take panoramic views from the air, is equipped with eight lenses whose combined range embraces the entire terrain at all points of the compass. At an altitude of 15,000 feet it is possible to photograph an area of 220 square miles, the manufacturers claimed.

Named By Roosevelt

It was President Roosevelt who first designated it as the White House on his official stationery. T. R. pointed out that nearly every State had an executive mansion (by which term the White House has been previously known), and that the President's home should bear a more distinctive name.

Used For Centuries

The Mohammedan lunar year of 354 days is a creation which corresponds to nothing in nature, says an Egyptologist. Yet this limping calendar system has been used for 1,513 years—or, as a Mohammedan would count it, 1,354 years.

Work Is Recognized

Two Westerners Honored At Meeting Of Canadian Seed Growers' Association

As recognition of their outstanding work as seed producers, R. D. Kirkham, Saltcoats, Sask., and W. D. Lang, Cawston, B.C., were made honorary life members of the Canadian Seed Growers' Association, in convention at Edmonton. Further honor was conferred when the two growers were made "Robertson associates" of the organization, a distinction commemorative of Jas. W. Robertson, former Dominion agricultural commissioner.

Mr. Lang has been active in the association for 15 years and Mr. Kirkham for 20 years, during which time the latter has done important work in the purification of Marquis wheat. Bronze medals will be presented later.

May Take Pets On Train

New Rules For Passengers Using Sleeping Car Drawing Rooms Or Compartments

Animal lovers may take their pets with them, and not leave them at home or crate them when travelling on trains, it was learned yesterday. The Canadian National Railway, the Canadian Pacific and the Pullman Company announced patrons of sleeping car drawing rooms or compartments might take with them, dogs, cats or small animals, or birds, as long as they were not vicious or objectionable. But they must be in suitable containers.

The privilege does not apply to passengers occupying space in the body of the car, and the pets will not be allowed outside of their masters' rooms.

Had To Think Quickly

A barrister who was sometimes forgetful, having been engaged to plead the cause of an offender, began by saying: "I know the prisoner at the bar, and he bears the character of being a most consummate and impudent scoundrel."

Here somebody whispered to him that the prisoner was his client, whereupon he continued: "But what great and good man ever lived who was not accuminated by many of his contemporaries?"

The song sparrow has about 2,500 feathers.

WORRIED ABOUT YOUR HEALTH?

Let SASKASAL regulate and maintain it

Nature gives to Canada in magnificent abundance the natural Mineral Salts found in Little Manitous. These health-giving Salts are recovered and refined by expert Chemists in the form of SASKASAL SALTS.

Thus SASKASAL in turn gives to Canadians in simple form—easy and pleasant to take—the cleansing, purifying, revitalizing product of Nature itself. That is the simple story of SASKASAL. It is the health-giving Salts found in Little Manitous. These health-giving Salts are recovered and refined by expert Chemists in the form of SASKASAL SALTS. As All Drug Stores—60c.

A WORLD OF FLAVOR

LIBERALS SWEEP INTO POWER IN NEW BRUNSWICK

Saint John, N.B. — Liberal tides that swept Nova Scotia and British Columbia in 1933, spreading to Ontario and Saskatchewan last year, flooded New Brunswick with a turnover unprecedented in the history of this province.

The smashing victory of 43 Liberals, including their leader, A. A. Dymally, left the Conservative party with only five seats in the next house. Premier L. P. D. Tilley and every member of his cabinet met defeat. From a total of 14 at dissolution, membership of the former opposition has been increased by 29.

The handful of Conservatives who will face more than two score Liberals across the legislature floor are Hon. F. C. Squires, speaker of the last house; G. W. Perry and E. W. Melville, elected in Carleton and Robert McAllister and A. C. Smith, elected in Saint John county.

Defeated government members are Mr. Tilley, premier and minister of lands and mines; Hon. W. H. Harrison, attorney-general; Hon. Lewis Smith, minister of agriculture; Hon. G. H. I. Cockburn, president of the executive council; Hon. H. T. Taylor, minister of health and labor; Hon. D. A. Stewart, minister of public works; Hon. A. J. Leger, provincial secretary-treasurer, and Hon. E. A. Reilly, chairman of the New Brunswick electric power commission and minister without portfolio.

Leading a campaign for the first time, Mr. Dymally polled the largest vote in Kent. Mr. Tilley, contesting his old constituency of Saint John City for the first time as premier, and the attorney-general, went down in the same riding.

The Liberal sweep was so complete nine Conservative candidates lost their deposits in Gloucester, Kent and Madawaska. Two independents in the latter constituency, only one where straight Liberal-Conservative fights did not prevail, also met the same fate.

Agriculture Research

Needed To Solve Present And Future Problems

Edmonton. — Agricultural research will be needed in Canada to solve its present and future problems, and such research in turn will require all available resources, said Dr. J. M. Swaine, director of research for the Dominion department of agriculture, in an address at the closing session of the technical agriculturists convention here.

Co-ordination in this, as in other departments, is essential to success, Dr. Swaine declared, and through co-operative committees the work of the various governmental and institutional research bodies is now being developed along more practical and unified lines.

Dr. Swaine denied that scientific research is to be feared on account of the greater production that its discoveries will make possible. "Improved distribution of products will take care of the increased production," he said, adding that agricultural research in this country is being directed more particularly toward improvement in quality and reduction of operating costs.

Paris Deluged By Rain

Downpour Lasted Half An Hour And Disrupted Traffic

Paris. — A deluge said to be the most severe in memory fell on Paris, inundating streets, flooding cellars, forming veritable lakes in low sections and disrupting traffic.

The downpour, which lasted 30 minutes, sent pedestrians rushing to cover and cleared car terraces.

Versailles was hit by the same downpour. Many trees were uprooted and the famous Rose Gardens were transformed into lakes.

Empire Naval Defence

Toronto, Ont. — "Sea cadet training is good but without sea power is a waste of time and money," Sam Harris, president of the Navy League of Canada, told the annual meeting of the Dominion council as it was announced the council would discuss a resolution favoring a policy of empire naval defence.

British Air Crash

Swanington, England. — Air Vice-Marshal Charles Stuart Burnett was injured when his airplane, lost in a thick fog over this London town, crashed and was destroyed. The pilot was slightly injured.

Convention For The Deaf

Winnipeg Man Is Elected President

Saskatoon. — Charles W. White of Winnipeg was elected president by acclamation of the Western Canada Association for the Deaf at the fourth evening session of the triennial convention. Mr. Alec Swanson, R.A., and farmer of the Lacombe district in Alberta, was chosen first vice-president, also by acclamation, while Gomer E. Norris of Muenster and H. N. Phillips of Winnipeg were elected second vice-president and secretary respectively.

A noteworthy step on the part of the convention was the unanimous voting of \$50 to Sigurd Sanda of Saskatoon to enable him to carry on his experiments in cures for the deaf and near-deaf. Mr. Sanda, local scientist and inventor, will engage in research on hearing problems during the summer months.

Peace Seems Nearer

Ironing Out The Difficulties Between France And Germany

Paris. — Premier Pierre Laval declared he was willing to negotiate with Adolf Hitler on a "peace arrangement" for submission to all European powers, if it appeared "really possible."

"If the eventualities of a Franco-German agreement, which would respect the integrity of all powers, appears really possible soon," the premier told the senate foreign affairs committee, he "would not hesitate to do his duty in favor of general peace and reconstruction of Europe."

Hitler's offer of Germany's "peace and friendship," without any territorial demands, in his recent reichstag speech, Laval indicated, inspired his remarks.

Sir Robert Borden

At Eighty-One He Gives Formula For Long Life

Ottawa. — Eighty-one years old, Rt. Hon. Sir Robert Borden celebrated his birthday here recently. Abundant work, and little worry was the formula given by Canada's "grand old man" for a long life.

Sir Robert was born at Grand Pre, Nova Scotia, on June 28, 1854. "No one can deny that confused and very difficult conditions confront the nations to-day, but, even at my advanced age, I am still a confirmed optimist; and I not only trust but believe that all will be well with the world," Sir Robert said in an interview. "This is quite consistent with my belief that certain anomalies in our social order ought to be and will be corrected."

Floods In North

Railway Lines In Peace River District Reported Blocked

Edmonton. — Northern Alberta railway line to Peace River district was reported blocked at Widewater as floods in the Lesser Slave Lake region continued to engulf the north of Grouard was reported inundated for miles and farmers were moving mail, freight and even hogs by boat to Big Meadows from where wagons were able to reach the railway.

Flood waters halted the Northern Alberta Railway train which left Edmonton for Peace River, near Slave Lake village.

Receive Compensation

Ottawa. — Members of the senate and the House of Commons will be compensated for extra expenses incurred by reason of the long adjournment taken at Easter and extending from April 17 to May 20. An item in the supplementary estimates tabled provides \$20,000 from which members will be paid the equivalent of their travelling and living expenses for the journey to their homes and return to Ottawa.

Would Strengthen Navy

Paris. — The scrapping of important existing naval treaties was forecast in a resolution adopted by the naval affairs committee of the chamber of deputies which invited the government to take "all useful measures" to strengthen France's naval power in the Mediterranean and the Atlantic.

Jap Troops For China

Tokyo. — Japanese military leaders decided in Hsinking that military operations were necessary to clear up the situation on the Jehol-Chahar border and immediately ordered a Manchukuo detachment to attack "offending" Chinese forces," said a Rengo (Japanese) news agency dispatch.

Exchange Of Views

Anthony Eden Talks With Mussolini About Ethiopia

Rome. — Premier Benito Mussolini of Italy and Anthony Eden, British minister for League of Nations affairs, talked for an hour "with the greatest frankness" about Ethiopia, but British and Italian spokesmen both said afterward they reached no agreement.

An official communique issued after the conference emphasized the conversation was only an exchange of views, the Italian spokesmen saying Eden made no proposals for settlement of the African issue and the British commenting that the "British and Italian viewpoints were fully set out."

TAKE MEASURES TO COMBAT THE DROUTH PROBLEM

Edmonton. — Extensive and diversified measures for meeting the problem of drouth area farming are being taken, it was announced to the convention of the Canadian Society of Technical Agriculturists at the university.

Plans of the Dominion government in that connection were outlined by Dr. E. S. Archibald, director of Dominion experimental farms.

Efforts will be made by the federal authorities, said Dr. Archibald, to co-operate to the full with all the provincial agencies in the field, in order to grapple successfully with the problem of the southern prairie region of western Canada.

Dr. E. S. Hopkins, Dominion agricultural husbandman, told the convention that he is optimistic about dry-land farming, believing that it has a more promising future than general farming eastern Canada.

Some 36,000,000 acres of land in the prairie provinces are affected by dry conditions, Dr. Archibald noted, and to meet the situation thus created a rehabilitation program has been drawn up under legislation passed this year at Ottawa. The program is to run for five years, and the first year's vote is \$750,000, with an additional \$500,000 voted later for water development work.

Fact-finding from every angle possible of interest to the farming industry will be the objective of the new program, as explained by Dr. Archibald. An advisory committee has been set up representative of all the provinces, and working committees have been appointed on water development, soil drifting, and soil surveys, these being three points of special concern to the drouth areas.

Ten new illustration stations have been added to the 23 already in existence in the dry belt and will be operated as district experimental sub-stations.

In those areas that have been abandoned, new classifications of the soils will be made, with the universities assisting, and ways and means of bringing them back to profitable use will be studied.

Other efforts included under the rehabilitation program and outlined by Dr. Archibald include reclamation blocks; a series of experiments in re-seeding methods; personal assistance to farmer desiring to do tree-planting; encouragement of co-operative activity among farmers in various lines, and investigation into the possibilities of water development.

GIFT DECLINED

It has been announced that Lady Houston's offer of \$1,000,000 for the air defence of London has been declined by the Chancellor of the Exchequer. Above is a picture of Lady Houston who is very much interested in all matters pertaining to England.

Competition From Japan

May Have To Adopt Other Methods To Compete With Cheap Products

Paris. — Possibility of using Japan's own industrial methods to compete with her cheap products was raised at the convention of the International Chamber of Commerce.

Sir Arthur Balfour of Great Britain told the 1,000 delegates from 35 countries although Japanese competition may harass individual business, he was convinced it "has great possibilities for international economic good."

Henry Laureys, dean of the Montreal School of Higher Commercial Studies, is the Canadian delegate. British and American business leaders said after the session in informal discussion the only means of meeting Japan's competition was to study her methods of "rationalization of industry," whereby national production is turned into a single industry into a single company instead of dozens.

Walchand Hirachand, Indian business executive, startled the delegates by stating India would be a powerful industrial nation if England stopped "forcing India into agriculture" in order to protect the mother country's industries.

More Help For Veterans

Additional \$500,000 Has Been Allowed For Unemployment Relief

Ottawa. — Implementation of some recommendations of the report of Mr. Justice J. D. Hyndman's commission, which investigated unemployment conditions among ex-service men, is indicated in the supplementary estimates tabled in the House of Commons. Unemployment relief to veterans with small pensions and whom municipalities have continued to regard as responsibility of the Dominion as a whole, has an appropriation of an additional \$500,000.

Gasoline Price War

Montreal. — From backyards and scrap heaps in Montreal ancient types of automobiles are now seen puffing along the streets. The gas price war has brought the price within reach of most people and those who could not afford to run their cars before are now bringing them out of storage and filling them up with cheap fuel.

WHEN RAMSAY MACDONALD RESIGNED

Our photograph shows Mr. Ramsay MacDonald leaving Downing Street for Buckingham Palace when he placed his resignation in the King's hands. With him is his son, Malcolm, who has been given a post in the new Baldwin Cabinet.

The Farmer's Difficulties

Prince Of Wales Says Industry Never Knows What Day Will Bring Forth

London. — The Prince of Wales told a delegation of agricultural representatives of the Agricultural Beneficial Societies "the farmer is probably the most beset with difficulties of any man in England."

Receiving the delegates at St. James' palace, the prince said: "My experience in farming on the Duchy of Cornwall estate and my ranch in Canada has taught me a good deal of the practical difficulties of the farmer's life." (His Royal Highness' ranch is at High River, Alta.)

"The industry never knows what tomorrow will bring forth, for in addition to economic troubles, the farmer has always the uncertain forces of nature to contend with. They can easily exhaust his slender capital and cause complete ruin of a life-time's work."

Industrial Policy

Britain Planning To Provide Work For Unemployed

London. — The government is embarking upon a planned industrial policy as an aid to employment, political circles learned.

Intentions of the cabinet were learned when Sir Francis Wilson, chief industrial adviser to the government, was transferred to Premier Stanley Baldwin's own staff.

The government's recent decision to give railroads 440,000,000 (about \$200,000,000) for improvement of transportation facilities around London, it was understood, was the first step in the general planned policy.

OPPOSITION GIVEN TO PROPOSAL OF GRAIN DEALERS

Ottawa. — Strong opposition was registered by the wheat pools to the proposal of the Winnipeg grain dealers that the government continue to stabilize the market but allow sales of futures and ordinary market operations whenever prices were above a fixed minimum. Evidence was given by Paul Brett, president of the Manitoba Wheat Pool, before the house committee studying the grain board bill.

Grain dealers proposed the new board follow the system in Argentina. It would only buy wheat when the price dropped below a minimum, and sell it as soon as possible at a loss if necessary. The board would absorb the loss.

So long as the government stabilized an otherwise open market, Mr. Brett contended, outside interests would take advantage of it to make profits. What the cost to the government in the final analysis would be much greater.

"If it is thought advisable and necessary to assist the producers of western Canada for the time being out of the taxes of all the people, it would be much more satisfactory to know this money was going entirely to help the producers and not part of it going to outside interests."

Mr. Brett took the view the only way to assure that all government assistance would find its way to the producer was by the method proposed in the bill, which gives the board a monopoly of marketing the entire crop and would do away with futures selling entirely.

Turning to the first three days in October last year, Mr. Brett said 4,500 bushels of wheat were delivered to country elevators. Hedges against this delivery should not have been greater than 5,000,000 as an outside limit on the Winnipeg market.

What happened, witness said, was that October futures closed at 81¢ on Sept. 30. They opened at 81 on Oct. 1, and dropped to 74½ in three days. This was despite purchases of 18,000,000 bushels by John I. McFarland to steady the market. Where would the price have gone if he had not stabilized it?" he asked.

Witness said even if all the wheat shipped out of Argentina had been hedged in Winnipeg, the hedges were double what they should have been to meet the requirements of the trade. Argentina should have no right to hedge at Winnipeg.

It would be cheaper for the government to have a board that would handle the entire crop than to leave itself open to such attacks from outside interests in a free market, as occurred last October, Mr. Brett said.

SUGGEST A BONUS TO HELP ALONG HOUSING PLAN

Ottawa. — Suggestion for the payment of a 20 per cent. government bonus towards the construction of homes in Canada was heard in the senate from Hon. Raoul Dandurand. The utilization of the fund, which might be increased, would mean a total expenditure of \$500,000,000, the Liberal leader added.

Criticizing the \$10,000,000 housing measure, he declared the loaning of money under the bill would provide little help in the construction industry and the building trade; but the payment of a bonus would bring results.

Money was available to the extent of millions of dollars in banks and financial institutions for investment at four and five per cent; but what was required was encouragement to the investor at present in fear of small returns.

Senator George P. Graham (Lib., Brockville) did not think much money would be expended under the scheme. He did not think a loaning institution was going to lend 60 per cent. of the cost of a building and land knowing the government was in it and that the cost paid for was up to 80 per cent.

Rt. Hon. Arthur Meighen, senate leader, said Senator Graham would be correct "if he had in mind only commercial loaning institutions created for the purpose of making money." But the bill contemplated co-operation with the provinces and that the provinces would establish lending institutions.

This was the method the Dominion was taking to assist provincial and municipal schemes. The measure included some slum clearance and the erection of better houses for low wage-earning people in those districts.

"We are either going to have a housing policy or we are not, and I fancy the commons committee composed of members of both sides of the house had probably done the best that can be done," Senator Meighen stated.

Ban Submarine Warfare

Britain Ready To Discuss Naval Issues With European Powers

London. — Great Britain, with Germany's promise never again to engage in unrestricted submarine warfare in her possession, has made ready to discuss naval issues with France, Italy and Russia.

Prime Minister Stanley Baldwin informed the House of Commons that the three had been invited to send delegations to London, but evaded questions as to whether all invitations had been accepted.

Elected By Acclamation

Winnipeg. — Two Manitoba government members were elected by acclamation in provincial by-elections set for July. In Russell, Hon. I. B. Briffins, new minister of health, was unopposed, and J. R. B. became the new member for Arthur, formerly represented by the late Hon. D. L. McLeod.

Chinese Boy Finds Gold

Canton, China. — Reports of an extraordinary find of white quartz rich in raw/wire gold and of nuggets, in exciting the authorities here. The find is attributed to a small Chinese boy employed as a herdsman by a farmer named Tsai residing on Taduop mountain in the Unping district of this province.

Grant For Currie Estate

Ottawa. — Recognition by the nation of services of Sir Arthur William Currie, former commander of the Canadian Corps, who died in November, 1933, is now being recognized in supplementary estimates tabled in the House of Commons. An appropriation of \$50,000 has been made to his estate.

Appropriation For Militia

Ottawa. — Canada's military forces are represented in the supplementary estimates tabled in the House of Commons by estimates for all three arms of the services. For the militia the appropriation is \$1,557,000; for the naval service, \$145,000; and for aviation, \$1,302,000.

C.P.R. Earnings Up

Montreal. — Traffic earnings of the Canadian Pacific Railway Company for the week ending June 21 were \$2,375,000, an increase of \$230,000 over \$2,145,000 over the corresponding week last year.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, etc. Phone items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Miss Muriel Naylor, who has been teaching near Waterton Park, is spending the summer vacation with her parents at Coleman, Mr. and Mrs. James Naylor.

A splendid piece of handwork, the work of George Lord, in the form of a model C.P.R. engine No. 2810, is on exhibition in Goddard's window. The engine can be electrically operated.

The Calgary Exhibition and Stampede opens on Monday next, July 8th, coupled with the fiftieth anniversary of the arrival of the North West Mounted Police in Calgary.

Constable William Antel was lord high commissioner at Coleman for a while last week, when the mayor was away, the town secretary was indisposed and he had to shoulder the whole municipal burden.

The annual Garden Party, held by the Ladies' Aid of the United church, will take place on Wednesday afternoon, July 17th, on the grounds at the home of Mr. and Mrs. L. P. Robert. This is always a delightful affair, so keep the date open.

The closing day of school was again celebrated by a few pupils smashing about eighteen small bottles of ink on the outside walls of the school. Apparently no attempt has been made to put a stop to such practice, which is not carried on in neighboring towns.

The secretary of the Burma school district has received quite a number of applications for the position of teacher there, and asks us to announce that they do not require any other than the present teacher, Miss Cox, who is rendering good service.

Rev. G. H. and Mrs. Villet and family, accompanied by Mrs. Reid, of Edmonton, were guests at the home of Mr. and Mrs. J. J. Murray at Frank on Tuesday, on their way to Vancouver, where Mr. Villet will begin his pastorate at Canadian Memorial church. Mr. Villet was former pastor of the United church at Pincher Creek.

The following piano pupils of Miss Madeleine Chardon passed the examinations conducted under the Toronto Conservatory of Music by Mr. Frank Welsman on June the 17th: Introductory, Betty Ritchie, Bellevue honors; Primary, Georgette Dan, Frank, first-class honors; Junior, Umie Johnson, Coleman, first-class honors; Jean Cruickshank, Hilkom, A.T.C.M. performer's practical honors.

Fred Gavelin was a visitor to Calgary this week.

Speaking of the New Brunswick election, George says "the Liberals' brooms make clean sweeps." May be!

The little daughter of Mr. and Mrs. J. W. Verge, Calgary, met with injuries when her father's car collided with another.

Mr. and Mrs. E. H. Mack, Mrs. Harry Tilden and Mr. and Mrs. Eric Moffatt, of Clearholm, were recent visitors here with Mr. W. G. Moffatt.

Oil production in Alberta to the end of May was 417,109 barrels, compared with 547,282 barrels for the first five months of 1934.

For the Elks' Grand Lodge meeting at Vancouver the latter part of July or first of August, the railways are offering a special rate of a cent a mile. See posters for particulars.

Rev. James McNeill, pastor of Grace Presbyterian church, Calgary, is likely to be called to the pastorate of St. Andrew's Presbyterian church, St. John's, Newfoundland.

Lieut. Col. R. F. Barnes returned to Coleman last Thursday from Camp Lewis, Wash., where he had been the guest for ten days of the 66th Brigade, U.S. Artillery.

Remember—The Castle River Club Sports grounds situated at the South Fork bridge, four miles south of Burmis, seven miles southwest of Cowley, eleven miles west of Pincher. Best natural grandstand and sports field in the district. On July 17th, there will be regular stampede events—wild steer riding and roping, calf roping, bucking horse riding, horse shoe throwing, etc., etc. If you miss it, you miss the year's biggest attraction for this district.

A young man was deeply in love with a beautiful girl. One day she told him that the next Monday would be her twentieth anniversary. He told her he would send her some roses, one for every year she was old. He left an order with the florist, a personal friend, who because of their friendship, said to his assistant: "Here's an order for Mr. Flint for 20 roses to be delivered to Miss Blair. He's a fine customer, so put in an extra dozen." And the young man never knew what caused the girl to be so cool.

LIBERTY'S CANADIAN HALL OF FAME No. 7

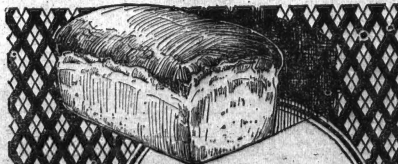

Without equipment or advice, Dr. Mahlon Locke of Williamsburg, Ontario, made a million dollars during the four years during which everybody else in the world was watching their fortunes

swindle. It is called the doctor with the X-ray hands. He smokes nickel cigars, has never had his shoes shined, and says there is no such thing as rheumatism. Williamsburg has increased

in population from 300 to 2,500 since he has been holding forth

Dislikes rich people, though he is wealthy himself, and owns the largest privately owned laboratory in the world. Charges a dollar to twist a patient's feet, twice and \$10 to deliver a baby. Has never had a mother die in childbirth during twenty-four years of practice.

Lives on Main Street with his wife, who still washes the clothes, although they employ three servants. Works sixteen hours in the rain sometimes. Says he will never retire and doesn't know what to do with his money. Hopes his son, Parker, will follow in his footsteps. Never sends out a bill or listens to his patients unless they're old timers. Treats cronies in the kitchen. Has less privacy than a gold fish and takes it.

Anger is a Poison

and very often caused by poisons from your food. If you find yourself angry often for slight cause, look to your food.

MOTHER'S BREAD

Is the great harmonizer. Instead of fighting with other foods, it gently soothes and promotes digestion. It's all food.
